github.com/denesnori - linkedin.com/in/denesnori/

I am a full-stack developer seeking a permanent role with opportunities for growth and learning. I love algorithmic thinking, learning about new technologies, and working on products that I am passionate about. My background is in Chemistry. Over time, my interest shifted towards Theoretical and Computational Chemistry, and then to programming.

Skills

Languages	Frameworks & Libraries	Testing	Databases	Other
JavaScript	Hapi	TDD	postgreSQL	Git / GitHub
Node	Express	Jasmine	Redis	Heroku
HTML5	React	QUnit		npm
CSS3	Redux	Circle CI		OAuth
SQL	Handlebars	Nightwatch		JWT
		Tape		
		Jest		

Experience

Childline Report Online Content
February 2017 - March 2017
A month long paid project to create an MVP for Childline. The goal is to build an app for anonymously reporting explicit explicite online content. The app uses the Yoti API for age verification. This project is funded by Yoti.

Founders & Coders
October 2016 - February 2017
16-week, full-time course in full-stack JavaScript software development. Peer-led learning environment with emphasis on pair-programming, test driven development and agile methodologies. Final projects include building prototypes and MVPs for charities and social enterprises.

Education

Founders & Coders, London (2016-17)
16 week full-stack development course

MSc Chemistry – First Class Hons (2013-15)
Eötvös Loránd University, Budapest, Hungary

BSc Chemistry - Upper Second Class Hons (2010-13)
Eötvös Loránd University, Budapest, Hungary
